

## Evidence presentation without the fuss.

### Plug. Play. Present.

The Evidence Presentation System is a truly plug-and-play experience. The cart comes with built-in speakers with the ability to be routed to your room's public address speakers. Display presentation media easily via a laptop and desktop computer connection.

Offering both digital and analog playback, the Evidence Presentation System has touchscreen capabilities that allow for on-screen annotations. Display images over projectors or flat screen monitors from a variety of portable devices. A wireless or wired flat panel touchscreen control unit allows you to operate all of the cart's functions from around the room.

Additional configurations include a control panel at the judge's bench, a touch screen monitor placed at the witness stand, and/or input connections placed at counsel tables.
